

Appl. No. : 10/506,398
Filed : September 1, 2004

REMARKS

According to 37 C.F.R. § 1.125, Applicant hereby submits a substitute specification. All the changes (including the matter being added to and the matter being deleted from) made in the substitute specification are supported by the original specification and drawings. Thus, the substitute specification includes no new matter. A marked up version of the substitute specification showing all the changes to the specification, and a version of the substitute specification without markings as to amended material are submitted with this paper. On the marked up version, the additions are underlined while the ~~deletions are struck through~~. The amendments to the specification are made to conform it to U.S. patent practice, and entry of the specification amendments is respectfully requested.

Claims 1-5 have been amended. Upon entry of the amendments, Claims 1-5 are pending in this application. The amendments to the claims are merely made for clarification or to conform the claims to U.S. practice, and do not narrow the scope of protection. Thus, the claim amendments do not constitute the addition of new matter to the application. Entry of the claim amendments is respectfully requested.

Should there be any questions concerning this application, the Examiner is respectfully invited to contact the undersigned at the telephone number appearing below.

Respectfully submitted,
